

PIPE HEATING JACKETS

SAFH150 / SAFH050

INSTALLED IN SECONDS, ANYWHERE YOU NEED THEM

SA FLEXIHEAT EX Pipe Heating Jackets give you a safe, effective and super-fast alternative to expensive and complex systems – they're perfect for use where trace heating fails, or is difficult to install. They simply and quickly wrap around pipes wherever low temperatures cause the contents to wax and solidify and can be installed by one worker within seconds. With three different sizes and linkable sections, they work with valves, instruments and complex manifold systems as well as straight and curved pipework. Effective in temperatures as low as -40°C, they keep compressors and pumps running to enable you to get on with those important maintenance jobs. **The potential cost savings are huge.**
